Table of Contents

Supplementary Figure 1. Directed acyclic graph (DAG) of depression, lifestyle, and metabolic status.

Supplementary Figure 2. Trends in SBP and DBP Among Americans from 2005 to 2023.

Supplementary Figure 3. Trends in average sleep time per night Among Americans from 2005 to 2023.

Supplementary Figure 4. Trends in average work time per week Among Americans from 2005 to 2023.

Supplementary Figure 5. Trends in exercise (MET-minutes per week) among Americans from 2007 to 2023.

Supplementary Figure 6. Trends in exercise (MET-minutes per week) among Americans from 2007 to 2023 without error bars.

Supplementary Table 1. Trends in PHQ-9 Depression Scores and Depression Status Among Americans from 2005 to 2023.

Supplementary Table 2. Trends in obesity Among Americans from 2005 to 2023.

Supplementary Table 3. Trends in BP Among Americans from 2005 to 2023.

Supplementary Table 4. Trends in sleep time per night Among Americans from 2005 to 2023.

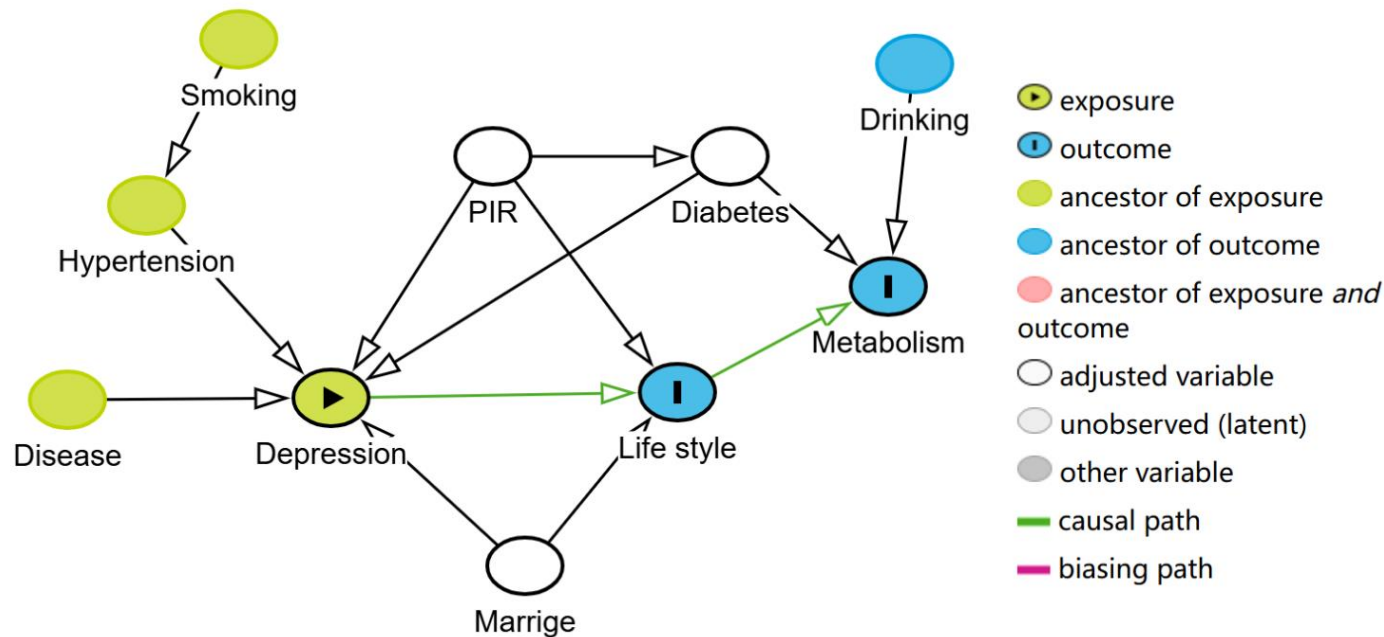

Supplementary Table 5. Trends in work time per week Among Americans from 2005 to 2023.

Supplementary Table 6. Trends in exercise (MET-minutes per week) Among Americans from 2007 to 2023.

Supplementary Table 7. Weighted linear regression between depression scores, obesity, and blood pressure.

Supplementary Table 8. Weighted linear regression between depression scores and lifestyle.

Supplementary Table 9. Weighted linear regression between lifestyle, obesity, and blood pressure.

Supplementary Figure 1. Directed acyclic graph (DAG) of depression, lifestyle, and metabolic status. PIR Family income poverty ratio, Life style including sleep time, worktime, exercise metabolic equivalent, Metabolism including obesity and blood pressure. PIR, marital status, diabetes, and hyperlipidemia were considered as confounding factors. Smoking, alcohol consumption, hypertension, and chronic conditions such as coronary heart disease, congestive heart failure, stroke, poorly controlled asthma, liver disease, arthritis, and cancer were considered as potential confounders.

Supplementary Figure 2. Trends in SBP and DBP Among Americans from 2005 to 2023. SBP Systolic blood pressure; DBP diastolic blood pressure. Due to the COVID-19 pandemic, sampling was paused in 2019-2020. Because of the small sample size, the 2019-2020 period was combined with the 2017-2018 period as a single group. Participants in the 2017-2018 and 2017-2020 periods theoretically overlap.

The Average Sleep Per Night Trend from 2005 to 2023

Supplementary Figure 3. Trends in average sleep duration per night Among Americans from 2005 to 2023. Due to the COVID-19 pandemic, sampling was paused in 2019-2020. Because of the small sample size, the 2019-2020 period was combined with the 2017-2018 period as a single group. Participants in the 2017-2018 and 2017-2020 periods theoretically overlap.

The Average Worktime Trend from 2005 to 2023

Supplementary Figure 4. Trends in average work time per week Among Americans from 2005 to 2023. Due to the COVID-19 pandemic, sampling was paused in 2019-2020. Because of the small sample size, the 2019-2020 period was combined with the 2017-2018 period as a single group. Participants in the 2017-2018 and 2017-2020 periods theoretically overlap.

The METs-min/week and Log METs-min/week Trends from 2007 to 2023

Supplementary Figure 5. Trends in exercise (MET-minutes per week) among Americans from 2007 to 2023. MET metabolic equivalent. Due to the COVID-19 pandemic, sampling was paused in 2019-2020. Because of the small sample size, the 2019-2020 period was combined with the 2017-2018 period as a single group. Participants in the 2017-2018 and 2017-2020 periods theoretically overlap.

The METs-min/week and Log METs-min/week Trends from 2007 to 2023 without error bars

Supplementary Figure 6. Trends in exercise (MET-minutes per week) among Americans from 2007 to 2023 without error bars. MET metabolic equivalent. Due to the COVID-19 pandemic, sampling was paused in 2019-2020. Because of the small sample size, the 2019-2020 period was combined with the 2017-2018 period as a single group. Participants in the 2017-2018 and 2017-2020 periods theoretically overlap.
