Supplementary Figure 1. (A) Spearman correlation among age, urinary phthalate metabolites, and the five DNA methylation aging algorithms in males; (B) Correlation analysis between two factors in females. *** $P < 0.001$; ** $P < 0.01$; and * $P < 0.05$.

Supplementary Figure 2. (A) Spearman correlation among age, urinary phthalate metabolites, and the five DNA methylation aging algorithms aged 50-64; (B) Correlation analysis between two factors aged ≥ 65 . *** $P < 0.001$; ** $P < 0.01$; and * $P < 0.05$.
